- Luggage carrier with back light
- Aluminium frame and rust-free parts
- Gear hub with foot-brake
- Aerodynamic full-cover hood
- Side windows may be opened
- Strong double-based aluminium rims
- Mono hub with closed ball-bearings and double-activated hydraulic disc brakes
- Torsion bar suspension
- Impact resistant base designed to repel bumps
- Adjustable steering damper with 6 positions
- Patented 3-point steering system
- Propstand
- Number plate
- Low entry level
- Reflectors on the hood, tyres and base
- Multi-adjustable handlebars ensure the correct posture for cycling
- 5-point seatbelt for all children

Technical data

- Frame construction: Aluminium 6061
- Cabin base: Impact-resistant polyethylene, UV stabilised
- Hood: Nylon, shower-proof PVC free fabric
- Steering system: Patented 3-point steering system
- Front wheel suspension: Stand-alone torsion bar suspension
- Front wheels: 20X1.75 with mono-suspended hub, double-based aluminium rim and hydraulic disc brakes
- Back wheels: 26x1.75 with internal gears and footbrake
- Net weight: 44 kg
- Hood+seats: 12 kg
- Load capacity: 100 kg
- Wheel track spacing: 86 cm
- Dimensions: Length 218 cm, width 90 cm, height 120 cm
- Cabin dimensions: Length 95 cm, width 70 cm, elbow width 73 cm, hood height above seats (front) 73 cm (back) 54 cm

4 CHILD CARRIER BIKE

Great vehicle for daycare mothers and nurseries

- Take the children on outings
- Safely transport 4 children
- Elegant design
- Exceptional road-holding qualities
- Flexible layout
- Suspension and great comfort
- Delivered ready to ride

4 child carrier bike

Kangaroo is a 4 child carrier bike designed to meet the transport needs of daycare mothers and nurseries.

To make outings comfortable for adults, much emphasis has been placed on modern ergonomic requirements. This is reflected by the multi-adjustable handlebars, which may be individually adjusted. The same is true of the seat, which is fitted with a quick tightener, making it easy to change user.

The frame construction is light and strong with torsional stability. The bike is fitted with a patented three-point steering system together with an adjustable steering damper, which provides the bike with good stability and optimal road-holding qualities.

Naturally, thought has also been given to the safety and comfort of the children during outings. The child sits comfortably in a closed cabin of high quality. They are also secured by a five-point seatbelt, so they can sit safely during the outing. Furthermore, the bike is shock-absorbing and fitted with a torsion suspension so that the children avoid bumps and jolts during outings. The bike is fitted with hydraulic disc brakes on the front wheels, which ensure good braking action irrespective of wind and weather.

The children can "board" the bike themselves and the nursery worker thereby avoids heavy and awkward lifting, while the children find getting in themselves fun.

The end result is an ideal vehicle for nursery workers/daycare mothers, where safety, comfort and ergonomics all come together. It is ideal for long outings. For example an outing to the day nursery, the playground or just a trip outside. Adults have greater freedom of action by being able to travel within a larger radius using bike transport.

And the children will love it!

Accessories

Comfortable cushioning is optional. This provides even better comfort for sitting.

The rain cover provides excellent protection of the hood on rainy days.

The useful life of the hood is extended by not leaving the bike in direct sunlight for long periods of time. Use the cover instead.

Good details

The bike is easy to park with the practical propstand.

At the same time, the propstand also helps ensure safe entry.

Good opportunities for adjusting the ventilation of the cabin.

With the help of a zipper, both sides and the back flaps can be fully or partially opened.

The front of the cabin can also be rolled all the way up on hot summer days.
